

Programming and Databases Trends: Survey Findings and Analysis

Sayed Rahaman

19-09-2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Data Interpreter and analysis goal
- Demographic
 - Data Gathering
 - Data Analysis
 - Data Findings
- Results are presented with Visualization and trends
- Discussion of overall findings and Inferences regarding the previous results
- Final Conclusion

INTRODUCTION

- Stack Overflow's Annual Developer Survey is the largest and most comprehensive survey of people who code around the world.
- Programming plays a vital role in today's world, it drives innovation, automates tasks, and powers technology across all industries
- This presentation aims to explore the technologies currently utilized by developers and forecast future tech trends
- The Problem that has been focused here are:
 - What are the current trends in programming and database languages ?
 - What are the future trends in programming and database languages ?

METHODOLOGY

- Collection of Survey Data & its exploration
 - Web Scrapping
 - APIs (Application Programming Interfaces)
 - Data Queries
- Data Wrangling
- Exploratory Data Analysis
- Data Visualization
 - Highlighting the distribution, relationships, composition and comparison of data:
- Dashboard

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 Language Trend

Next Year

Top 10 Language Desired to learn

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript seems to keep as leading language.
- With growth of AI, increased in popularity of Python
- Web Development language continue to be in the top, e.g. HTML & CSS and JavaScript

Implications

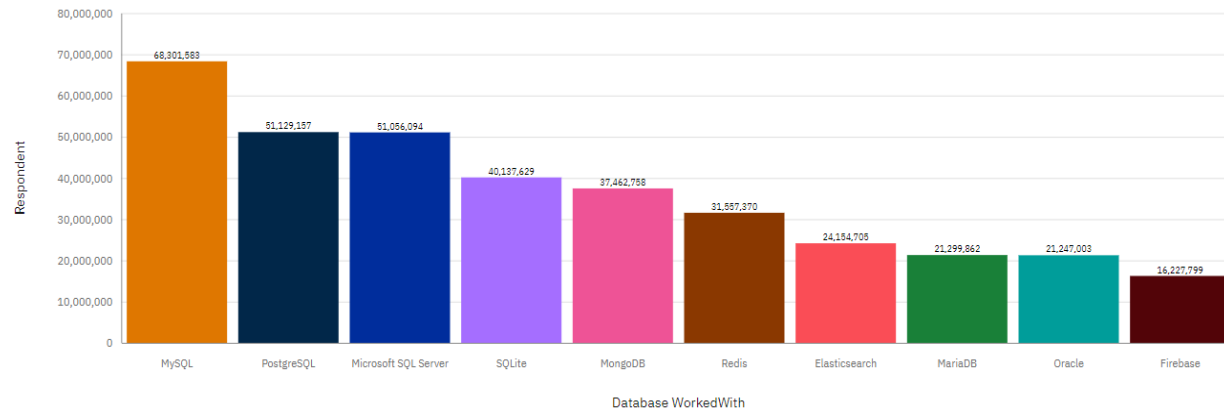

- Python will in be top , With rise of AI Python will also grow .
- Possible developers migration from JavaScript to TypeScript.

DATABASE TRENDS

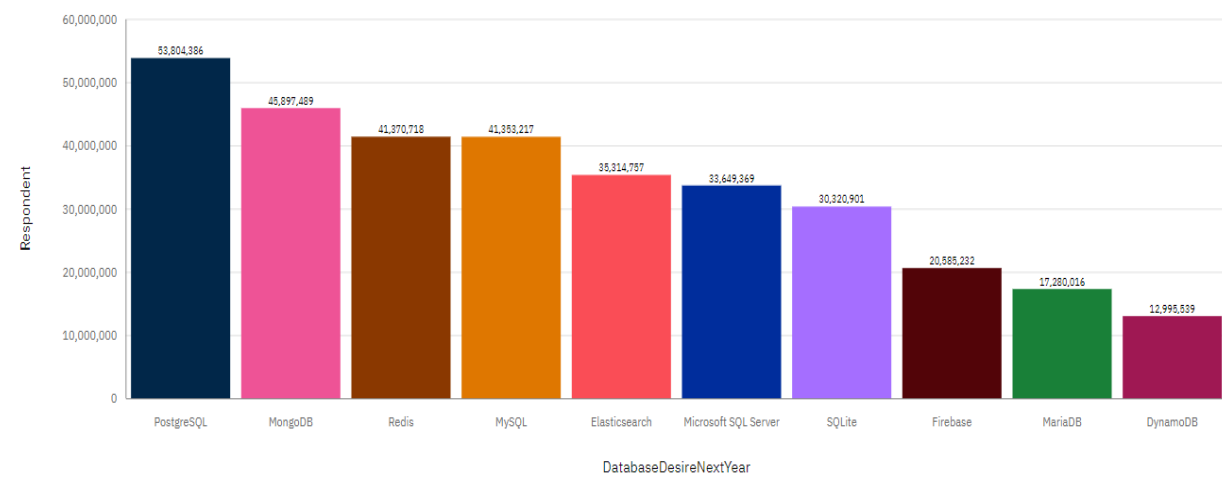

Current Year

Next Year

Top 10 Database Trend

Top 10 Database Desired to learn

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Increase in Interest in PostgreSQL and MongoDB.
- MongoDB is growing significantly.
- Lack of interest in Oracle

Implications

- PostgreSQL and MongoDB establishment in the market.
- There has been a shift in investment from MySQL and Microsoft SQL Server to modern databases like PostgreSQL, MongoDB, and Redis.

DASHBOARD

Check out My Dashboard here:

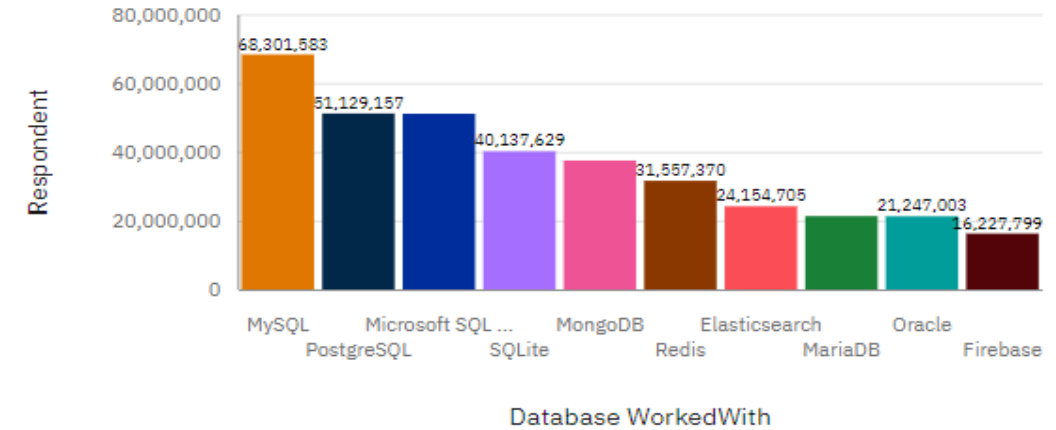

<https://github.com/Sayed27-Dev/Capstone.git>

DASHBOARD TAB 1

Top 10 Language: Usage Trends and Insights

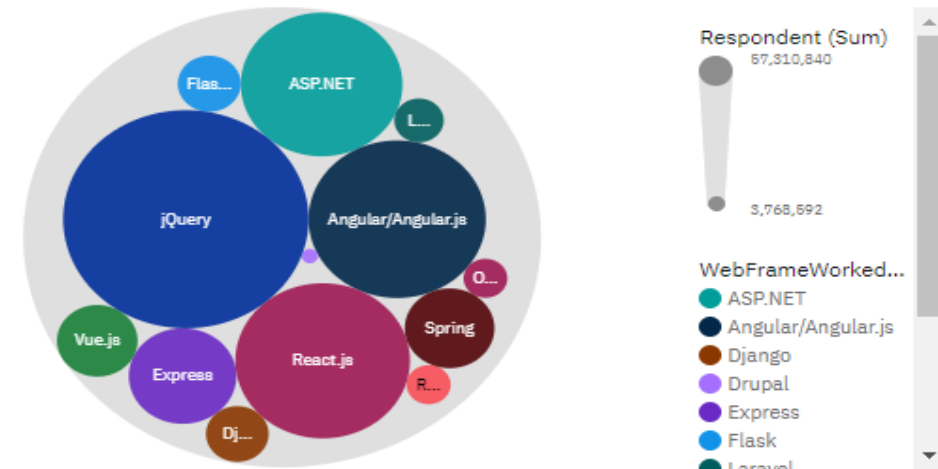

Top 10 Databases: Usage Trends and Insights

Top Platform interacted

Top 10 Frame Work Used

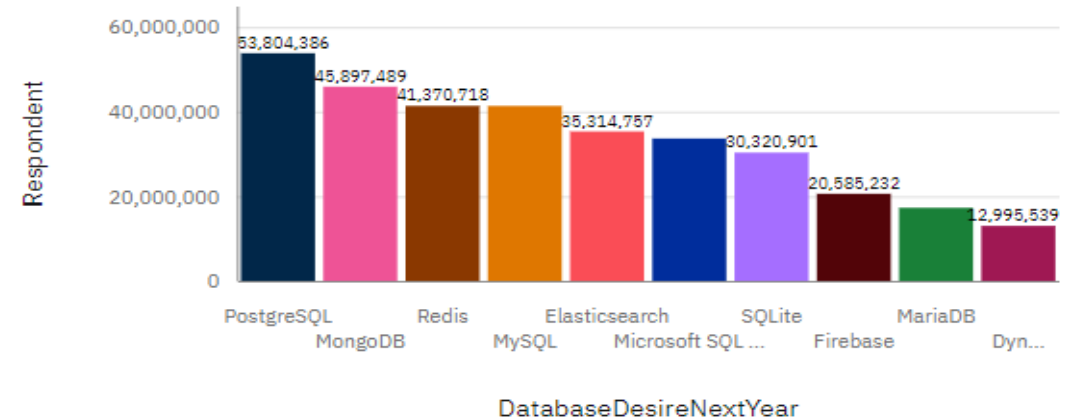

DASHBOARD TAB 2

Top Language Desire To Learn Next Year

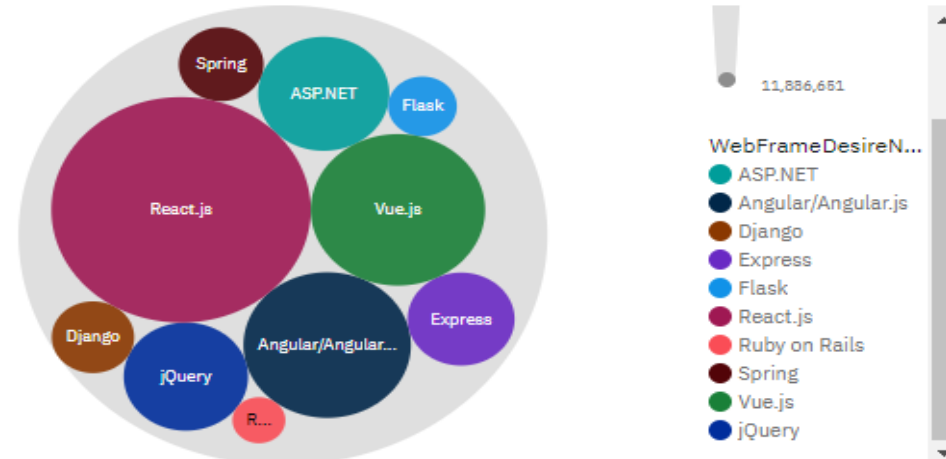

Top Database Developers Want to Learn Next Year

Next Year's Most Desired Platforms

Top Web Frameworks on Developers' Wish List

DASHBOARD TAB 3

Gender Distribution of Respondents

Gender
● Woman
● Man

Country-wise Respondent Distribution

Respondent by Age

Gender and Education Level Distribution

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- JavaScript is one of the popular Programming language. TypeScript is getting popular
- Over 90% young male developers
- Most of the developers are from developed country.
- Linux and Docker presented to be at the top instead of Windows.

Implications

- JavaScript and TypeScript web frames gaining followers.
- The most popular database is expected to be PostgreSQL.
- Linux will be at top.
- Global polarization of developers location and gender.

CONCLUSION

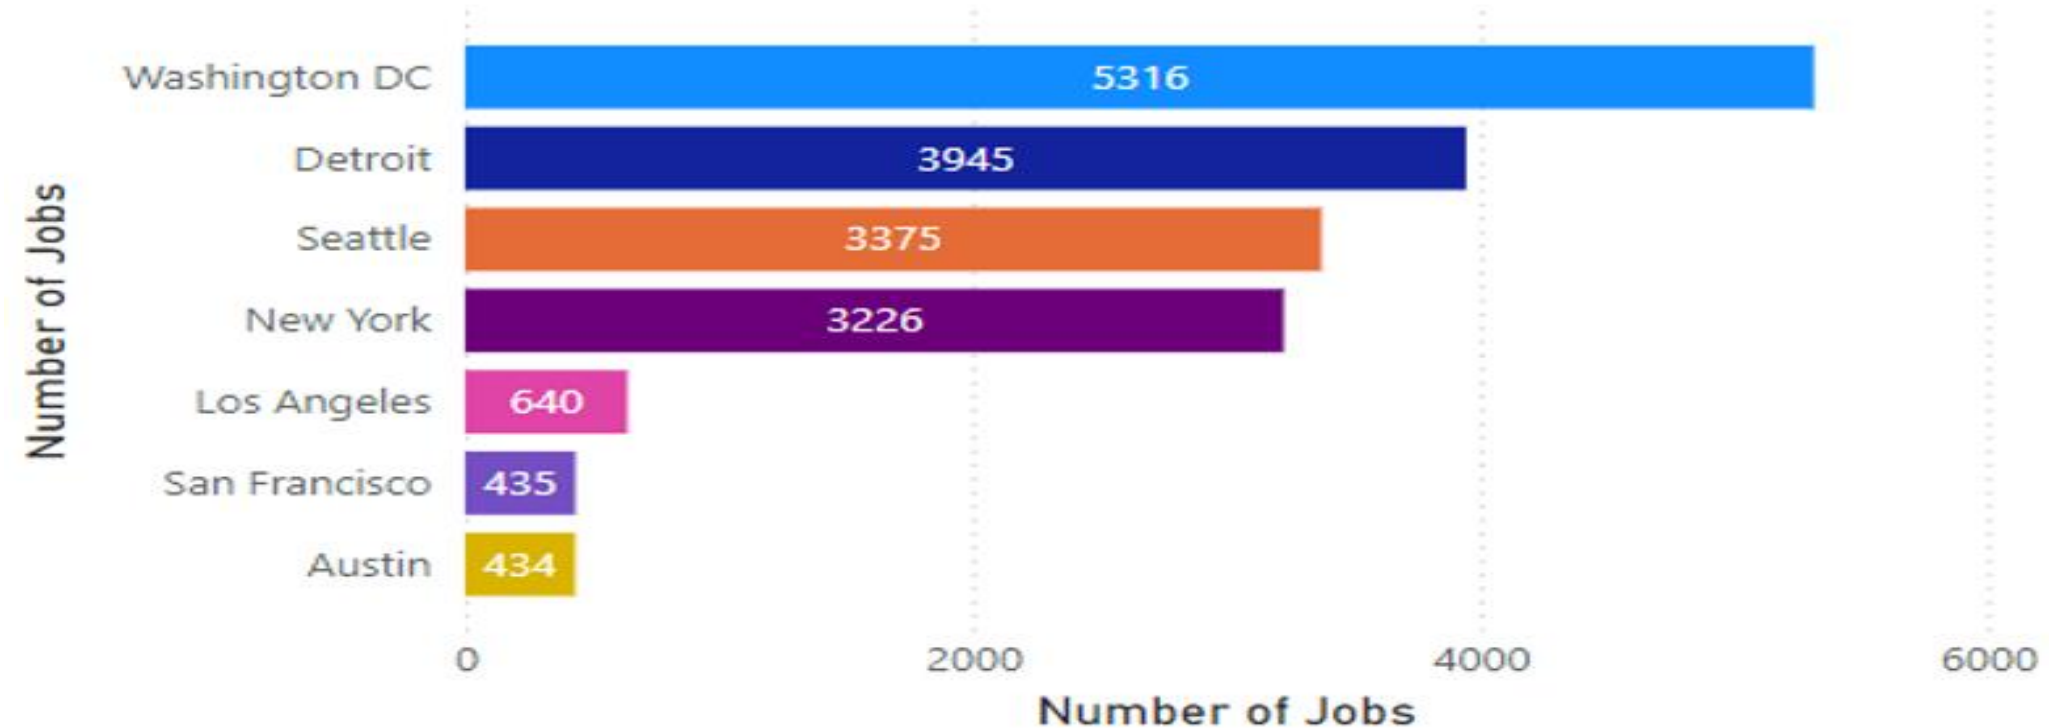

- Web Development programming language estimated to be at top.
- Python will gain more user , with the rise of AI.
- PostgreSQL will be the most demanding database beating MySQL.
- Developers are people with very marked characteristics.

APPENDIX

JOB POSTINGS

Number of Jobs by Location

POPULAR LANGUAGES

Annual Average Salary by Language
